

JESÚS A. GARRIDO CORDERO

I am a highly skilled Cloud Backend Engineer with over ten years of experience in designing, developing, and maintaining cloud-based solutions. Proficient in back-end development, database management, and cloud technologies, excelling at delivering high-performance, scalable, and reliable systems. I thrive on collaborating with cross-functional teams to achieve innovative project goals.

WORK EXPERIENCE

- 📅 April 2022 - June 2024
📍 Ericsson, Spain
Cloud Backend Engineer
 - Developed and maintained multiple microservices, including those with ML/AI code in Python, handling extensive data.
 - Managed namespaces in the cloud environment, overseeing the deployment of multiple microservices with Kubernetes and Docker, utilizing Helm.
- 📅 2013 - 2022
📍 StreamingConnect, Spain
Co-Founder and Backend Developer
 - Developed a Streaming API for real-time ad insertion in FAST technologies.
 - Implemented systems for virtual education, enhancing remote learning capabilities.

EDUCATION

- 📅 09/2013 - 16/04/2022
📍 Universidad de Málaga
Health engineering with specialitation in biomedical engineering. - Unfinished

GENERAL SKILLS

- Proficient in Python, including FastAPI and SQLAlchemy.
- Experienced with PostgreSQL and DBever.
- Comfortable working with Java and .NET.
- Proficient in using Docker and Kubernetes for container orchestration.
- Experienced with CI/CD pipelines using Jenkins and Spinnaker.
- Skilled in Helm for Kubernetes deployment management.
- Knowledgeable in cloud solutions and cloud-based deployment.
- Experienced with Nginx for web server deployment.
- Familiar with the Yang model for network configuration.
- Experienced with Ffmpeg and streaming server deployment.
