Crediting of previous achievements

To whom it may concern,

I certify, Jordan Eyer, SW R&D Manager in the Cognitive Network Solutions area at Ericsson Spain, that Jesus Garrido has been related to the company since April 19th, 2022.

For 6 months, he has been performing a full-time internship as a backend developer, where his main duties were the following:

- Analyzes requirements for cloud-native microservices and legacy Java-based modules.
- Drives application design and architecture.
- Designs, develops in Python, and deploys microservices-based applications into cloud infrastructures.
- Develops APIs to ensure the connectivity across modules.
- Ensures data consistency and database non-functional performance.
- Design and implement a test-driven development approach.
- Maintains software and support life-cycle-management of microservices & machine learning components through CICD.
- Supports product & security documentation.
- Collaborates effectively in an international context, partially remotely, and within the Agile methodology.

After the completion of his internship, and since October 1st, 2022, Jesus Garrido is a full-time regular employee of the organization and work as a backend developer, where he continues to excel in his duties.
